# REPRODUCTION QUALITY NOTICE

This document is the best quality available. The copy furnished to DTIC contained pages that may have the following quality problems:

Pages smaller or larger than normal.

\*

(

- Pages with background color or light colored printing.
- Pages with small type or poor printing; and or
- Pages with continuous tone material or color photographs.

Due to various output media available these conditions may or may not cause poor legibility in the microfiche or hardcopy output you receive.

If this block is checked, the copy furnished to DTIC contained pages with color printing, that when reproduced in Black and White, may change detail of the original copy.

# SECURITY MARKING

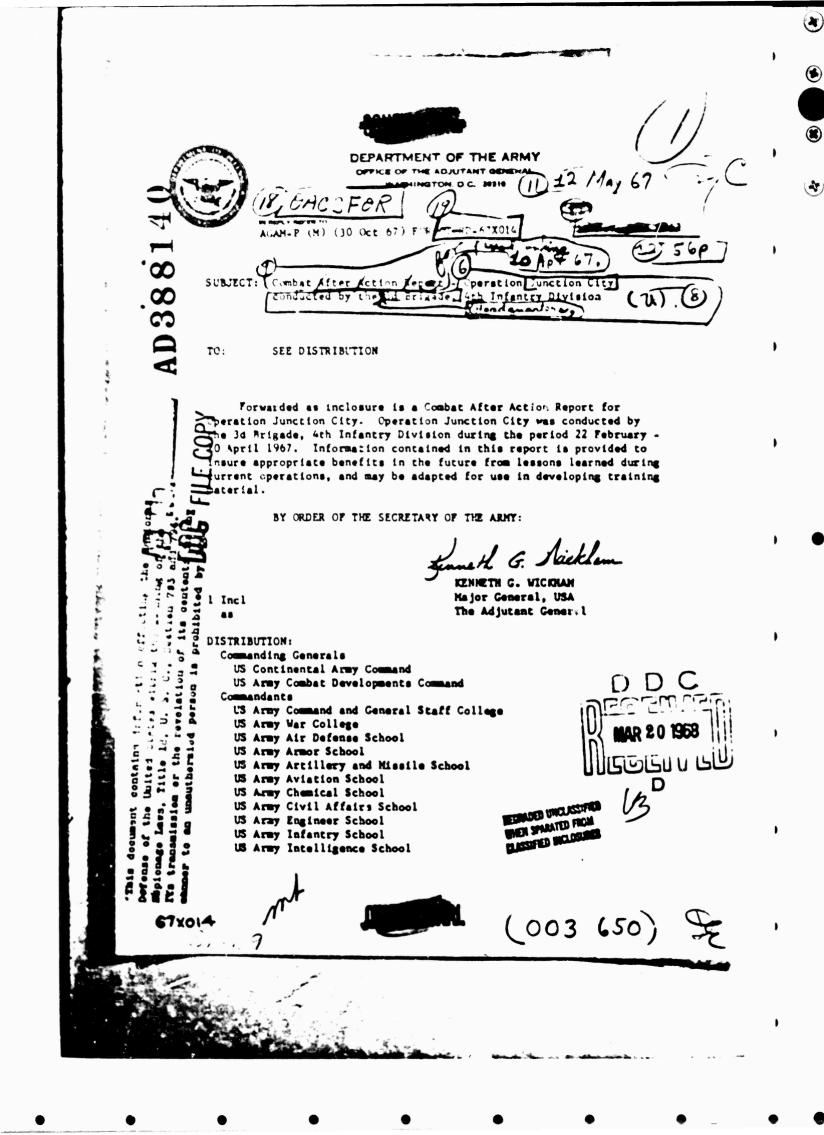

(4)

The classified or limited status of this report applies to each page, unless otherwise marked.

Separate page printouts MUST be marked accordingly.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE LAWS, TITLE 18, U.S.C., SECTIONS 793 AND 794. THE TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW.

MOTICE: When government or other drawings, specifications or other data are used for any purpose other than in connection with a definitely related government procurement operation, the U. S. Government thereby incurs no responsibility, nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use or sell any patented invention that may in any way be related thereto.

- (1) Rempt to Marial mamply during this period of time was limited. The majority of recupity was accomplished by convery however, i.e., in , which sto was flow to his in to by "He'D beliconters. In the experime on waring dance who his he history, list, list, list, and list contex Assault solitories Gameries. Tempty was conducted in mouther server and no unusual situations were encountered. In propagation for this assertion a non-mirrotical reason was associed at the Dat Tieng air strip for use by That aircraft operating to and from the aircraft. It was since your taken dates.
- (3) Refueling: Refueling of our organic OR23G air aft while in Thai Bi area became a problem and a new from the Bdo section 44 to be placed with the Division Artillery Aviation Section. The service them became setisfactory. At this time the semi-permanent Aviation are oling point at Dau Tieng was not operational. This meant the Bdo aviat in temperature at Dau Tieng throughout this phase.

#### (L) Ctr:

- (a) "Transic CC23G siremit flow many and worted missions during this phase. One such mission was the wire laying performed in a Fab. This was the first time this method had been employed. The mission enabled land line communications to be established insects this because the Ste GP and those of the 3/22 and 2/22. In support of this prese our CC23's flow blk missions, 1700 sortics and lokale hours and contried load presengate.
- (b) Problems experienced with our helicopters started on 6 March when during starting and run-up of one CR230 the bubble started creation and splite. It was patched by "E" Gospany 725th Haint in and is still in use.
- (c) At 1730 hours 7 Harch the engine failed in an 08230, we hillengton was autoretated to an unsecured area without further design. On animal and paratrague were extracted without incident. Overnight security of the hilcontur was provided by the 11 ACR. The following sorming the helicontur was extracted to Cn Chi although it took an unusual animal of time. Privary rause was the late arrival of the crew that property the aircraft for lifting.

#### Race I

(1) Maliberne Operations: This phase was also characterized by few heliberne operations. The first helilift occured on 19 March when a Combat Assault was made to LZ COLD (KT306703). It was a two In lift with the 3/22 conducting the initial assault. The lift was made from the Suci De airstrip. Although the first flight of five air-reft emperienced we difficulty, the second did. The VC had propered this LZ with command detenment alines so that an air assault could be thursted. Four of the choppers in the second flight were downed in the LZ, three were completely descroyed, the fourth was evecuated by CR-47. The lift continued until the 3/32 was in LZ GOLD. During this lift a total of 6 ships had been either demand or destroyed. After the 3/22 lift had been completed a therough casersh was made of the LZ and other nines were found with buried wires leading to concealed bushers. The few VC at this LZ proved to be a caretaker force. After refueling and regrouping the laith Aristics in whe able to provide 13 chips for the belillift of the 7/12. The lift of the 2/12 was absolute the VC fixed at the flight. Another seven ships were damaged. One of the seven had to

- (a) In support of this place of the Operation the OPEN aircraft flow Shi missions, 1972 portion, Life 50 hours and carried 1,229 ; accompra. On 3 April the OPENs where convined 198 passing re who is flying 23:00 hours. This phase was not free of instinct with the OPENs. A. 1750 hours 23 hirch after an OPENs lad landed at 3mol in for a passiver pickup, a Gh-17, Stappmach Scott, flow over and all juily in front of the OPENs. The rotar mash from the Gh-17 or and the main return to flow down into the tail bome. The resulting samps was to the main return the, the tail bome and the 'we 'wain cusponents of the tail return system. As the time of arrival of the Gh-17 the aviator-had shut down the engine, was not in the aircraft and could only hope no descape would ecour. The main return black sirer ft and could only hope no star would come. The main rotor blade on the CHEJO was turning fast enough that it sould not be stopped. Chein were not working out of the pad at the time of the sections. OFFIG Well's was lifted by CH-17 from Suni In to Cu and at 13578, 21 March 1577. It was further evenuated to the 605th Maintenance in (18) at Fin Lot.
- (b) On one occasion the 1/22 weed CS to capture a JOI, One of our aviature evecuated the JOI from the create to the De Thong Base Corps. Not knowing the mothed of capture a gos make was not used on this flight. Difere the landing was note at the base comp the aviator could hardly one from the effect of CS.
- (a) On 7 ipril the 2/12 excepted 30 tens of rice by Chiff. The rice was londed intervally and was a time bonaming process. All rice of this quantity should be loaded in mote and aling loaded. The CS-LT is the valuable to spind entire time in a 22 when not really assessary.

(1) Builters Operations: During the third plan of the Operation the Argude used builties to insert and entwork the Inferty troops. The first it is no the job Annar Re, builties from Tay Made a riceld to the circled at the first Klok Special Forces Comp on 11 April 1976.

This was the first in-country builties by the 187th Compat Annual Builties captur Congany. Bure were no problems extended at ring this lift, the 12 April of the Taying by G-78 from the Tang to Smit the, the 2/12 was builtieted to 12 Mill. (122 Rid5). The 2 was secured by the 2/22. This lift was also note by the 187th, their means in-country lift as a male. The lift was also and took on unugal arount of throp, their make would have completed this lift without refulling between the 187th did note. The use securities forter during this lift or the daily could have been not such as important factor during this lift or the daily could have been to this lift without refulling between the 187th did note.

The use not such as important factor during this lift or the daily could have been not such as important factor during the lift or the daily could have been to the their that the first have the such its surrent damps. On 12 April G/2/77 was buillified by G-4/7 from the Stoth Contact Annual Supert Allespher Congany. There were no problems experienced. The 2/12 moved from the Stoth Contact Annual Supert Builded from Rock Rick to the Sust in airtically. The best had no used to move another buttery of Arry from Smit In to Stoth Rick comp. The lift was langer than required for a stagle buttery were but the countil then for necessary of the Interior was langer than required for a stagle buttery were but the countil then for necessary of the Interior was langer.

CAMPBERTIAL

- (2) Recupyly: Acrtal recupyly was used extensively. The only significant problem encountered was the long turn around time. Supplied were lifted by UNID and CH-67 circreft in routine manner. The eviction section tenter was estationed at Suci De and served many hours of flying time.
- (3) Other: The CR23G strengt flow 341 missions, 754 serties, 212:25 hours and carried 778 passengers. The only incident experienced by this section during this phase occurred at 1032 on 19 April. After dropping a Special Forces NCO off on top of Mui Be Din the sergeent in off loading his equipment throw his elemping bag into the main retor system. This required that the main retor bioles be changed.
- (4) Summary: During the period of Operation JUNCTION CITY the Brigade conducted five Infantry Bn sized lifts by CH-47 and six by UMID sicrosit. There were four Artillers lifts by CH-47. Units conducting the UMID lifts were the 48th, 18th, 1824 and the 187th Combat Assoult Mail-copter Companies. In addition to the units listed above the 71st and 119th Combat Assault Helicopter Companies also supported the Brigade during the operations as resupply ships.

The Brigadee organic sircraft flow a total of 1739 missions, 3,526 serties, 1,033:55 hours and carried a total of 3,665 passengers. The 1,033:55 hours flying time represents many hours of maintenance, meet of which was accomplished during the hours of derkness. Excepting a few delly inspections at the field locations oil maintenance was performed at famp Rainier. The better lighting and working conditions can account for the high rate of flyable sircraft the section mainteined throughout the operation. The total flying time represents 41 intermediate (23 hours) inspections. All except three of these were pulled during hours of derkness. In some instances the crew chiefs worked through the night so that we could have one more aircraft flying for the following days operation.

- a. Intolligence concerning the Brigada's area of operation during Phases I, II, and III of Operation JUECTON CITI was chimical from 25th Division 3-3, the 195th heigada AI detectment, and from lainton visits to the Irai M and Out De Special Forces Camps.
- b. Amiliable information consorming the erus of open time for these I indicated a large number of tens cappe, hospitale, training sites and supply facilities were lossed within the AD. W Forces believed to a operating in the AD included the 70th Security Guard Regiment via 12972 to 171375, elements of the Salada the 10th Security Guard Regiment via 12972 to 171375, and the USO Artillery regiment whiche was unless ted. It was ensured that would attempt to avoid large scale components unless excess second certain.
- (1) From the incinning of the operation Nibrary 27 until the and on 1h North there was only one significant contest. On the 25th of February 27/12, via EXDMSM, was compact briarily by an estimated W platem. In W used the rune of thing a piece of come vire, simility to the type used with command determined name, across the anticipated route of the confiction with. Then the printrees reached the vire in followed it to the anticipated route as anticipated and killed by small arms. It was at this paint to 7; with appeal in a brief fire flight, breaking contest infere effective artillier; fire was incomplet to home. On the relationship, we contest the excitation of the new contests of W metalism and completely surremade. Using allow 4, 11) key an orthograph was able to half off 'to orray a anticipated the analysis of the compensate was 11 W ELA (EC), 30 W LA (Rou). Identification of the W with an ite 34 he, 771st Poplement was part the through decisionship at lawriton with, All other contests were limited to group of three to and the W. All other contests were limited to group of three to all W. Caly on this constants were limited to group of three to

- (2) There were three significant merter attacks during the operations of these only one had any affects. On 27 Feb at CLICH the 2/22 (4) larger site, KTO78641, received 60-70 rule film merter fire causing 10 US Mile. The morter attacks of 5 Merch, via KTU15777, and 9 Memby via WTY59768, both complemity missed their targets. On just consense what was believed to be morters firing were heard shartly after the units stopped for the cay. It is seemed the W were resistantly in a different direction prior to the attacks later that night. Judging from the number of remain. Of and 150 respectively, which impacted out side the friendly positions it is apparent that no attempt was made to adjust the morter fire seem it began.
- .(3) Of the sixteen base camps discovered the ware considered regimental size, ten bettalion size and the remaining four ware company size or waller, all base camps located were sixed 200 meters or cluster to a strain or other source of mater. But camp was entireled by a businer system with interconnecting tranch system. Defending positions strained evidence of careful planning of fields of fire, were well compensated and enterty organized. Seemy claywore positions were method on the enemy side of a true usually with a single strip of white cloth or an I out into the true.
- e. During phase I of Junction City, elements of COSVI were reportedly trapped wast of fauta is. Indications were that several ministers units moved into Environ him Jone C in an effort to relieve the pressure on COSVI elements. Environ units of in an encounsared in the Phase II operational area included the 101st Regiment of the UC artillary Regiment and possibly the the Loi intuition. Due to many losses suffered by VC forces on 20 Teh 67, wie 1727/779 and on 10-11 Repub 67 wie 1727/755 it was believed that VC units would engage in decisive counts unless suprised or forced to fight to protect installations they decord inpurtually.
- (1) Frost that there were W in the operational eyes was recoived on the first day of the operations. Three ARIs were damaged by AT rines, we ARIs were damaged by ARI rounds, and eight booky trope were loosted and destroyed.
- (2) On the 19th of March on simultie secoult into 12 0013 was 12755717 was not by command determined misse country the desirables of three belicoptors, designing three, billing 10 08 coldiers and wounding 18.
- (3) The streeting force on 21 March at the Battle of Sand Tre and identified as the 272 W September reinforced by elements of the U-80 Artillary Sa and other marries elements. Identification was made from expected documents and interestion of FMS. Of the waspens captured 30 were RF-24m. The presence of such a large ratio of AT measure indicates the W. was not for machinised forces. Through Anna II the W utilized the FMS-3 m. of feetile theiring wayers a plant AFFs. The mjority of magness captured were in extremely good condition and a master of AS-570 with folding beyonds were captured. It can be reasonably assumed those waspens were recently brought in country.
- (h) The other configurate covered but were limited to brief fire fights with ,in term wise W units. On 25 North, G. C., Lit. Begre in on a duly read electric question we compare by an estimated W plateau remaining in 2 M EL, 8 M MA and 1 decayed took. W committee were welling in 2 M EL, 8 M MA and 1 decayed took. W committee were welliams. On A, 2/22 briefly support on estimated plat size unit wie 12335756 on 25 April. The W unit was very unit amed and decayed 3 APS's with 120 words. There exists were unisses.
- (f) Some ware a few minor encounters with small groups of 2 to 5 W until the 3d of April when G/h/M car untered what was judicated to 50 to accurate a latest a summand of 165 in the often man and contigued until date when the W broke contact. Seturing the eres of the provises days contact a regimental size has say we less tad. So have corn had been recently complet and departed W standard 18 tops of find study, sum mino equipment and already. No further contact enough during Joseph Lip.

  I. During Flams II the 3d Bdc returned only Class 7 (Arry) among the Suci Day during Plans III all among orre from Daw Tiong and Tay Winh by air and overland convoy.

# e. Rospitalisation and Evecuations

- (1) For Operation JUNCTION CITY, beginning 22 Feb 1967, it was decided to move Go A, 25th Medical in to the formerd logistical base at Irol Pi. This company became operational on 2k Feb, replacing Go A, Lth Mad Rn which had deployed a medical section at Irol id for Operation GNDENI. Go A, 25th Med Rn was able to deploy a laboratory and denul capability with their redical section in Irol Bi. Two serosity of all biling the wore placed on standing at the medical company loss of the at Irol id.
- (2) Early in Operation JUNCTION CITY, the 3d Bdo, functioning at a blocking force, was in a relatively static role. But's operated from aliast OF treations in a fixed Tack. In this configuration, it was possible to locate the battalion and station and sur form in the research of the CP in direct support of the tention with a fixed IEE, where the artillary and an infantry betation now formed, a stagle aid station was adequate for modical support. Excustion was primarily by air, the routine and priority patients being returned to Trai Bt on resupply believed to any units of the brigade to main a more mobile role, moving from objective to affect to a involve the follows. Consequently it was functions on final main to daying he add station with the infunity units. There was increased militare on the company add was who often decided which of the wounded and sick required executions and artillery were deployed.
- (3) CONTION CITY II, beginnin. "All real Law, presented the brights will be first man essently situation. Burly in the lattle of 21 liam 1907, in anticipation of a large number of essentions additional Darbett beliappiers were requested. A total of four Darbett hitper or the right, ready to enter the landing sees as soos as the method situation remainted. These situation, many essentiant which toge that it commended excentions. In addition, many essentiant which tage taking amountion and other applies into the erea of opposite taking amountion and other applies into the erea of opposite taking amountion in the formed erea. Approximately 130 essentiaes were encounted in the action, % requiring execution to heaptimis, insectiving the brivado's mutical company in Dar Tiong.

10

(4) Undical evacuations and treatment after the Battle of Suni Tre were reutine and no significant or unusual situations were 'emecuntared. JUNCTION CITY, Phase III began 8 April 64 and presented little problem as to medical evacuation and treatment. The 6th Hadical In clearing company returned to been camp at Den Tiong as the need for its presence in the field during Phase III was not indicated. Adequate medical care and performance was given by the individual bettalion aid stations. An additional Dust-Off was essigned to Tay High which all wisted the problem of an adequate number of helicopters for evacuation. There were 18 cornalities evacuated during the last phase of the secretion and no significant delege were ensemblered.

### Ma Americal Resignant and Postularmon

a. Special Equipments Perimeter defense of a fire support base may be greatly extended by the addition of proplemed Rective concentrations to the normal direct fire accignments. These concentrations are identified to the percental meeting the perimeter and are accigned to specific hard tear sections for firing. Firing data is produced and impt at the gas positions. (See Leasuns Learned, Bethle of Seri 270).

b. H-578 proved to be usertiafectory for cross-creentry use even loss terrent housing end winch so used during CADRIMS. It was unable to stay with the H-LL3 and H-557. The use of an H-LL3 with febricated heist has proved adequate.

 $\theta_0$  . The dissel powered H-113 proved separator to the granitine potential H-113 in all respects.

#### d. Behniques

- . (1) An OH-230 beliespher was used to key come wise totween remote Fire Support Bases and the Bds CP. The beliespher merely dropped the wire across the top of the jumple entopy embling the traped to have land line commentention very quickly after as tablishing peak times.
- (2) Construction of busines, particularly for fire direction centers and CPs can be employed replicy when believes are used for the initial expectation. The busines is then helic with the top at ground level, growthy reducing the volumestality of the busines to flat transportation.
- (3) Speed was found to be most essential in the constructing of GP and Fire Direction Center Bedware. Swarel extre personnel was brought to the field just to sid in the construction of the Ste and Sm. GP. Once the business was complete they were past back to be an comp.
- (b) The use of the counter-centur guard proved offective. The norther guard get an assenth to the immediag rounds by sound. The following do y when the enemy norther peaktion the found; it lay assured to the estantial determined by the guard the provides counting during the attack.

# 15. Commender's Amplyois:

a. Operations within Western and Control Wer Zone C during the three phases of Operation JUNCTION CITY are considered to  $t_{\rm gray}$  been bighly excessful.

The destruction of tage comp facilities and capture of quantities of supplies, dominate, describing and version by imported entry propagate, restrictions and construction of facility extensive improvement of read act works and construction of families come will enhance future operations in the area.

In preserve of the initial plane of Pase II, is crosjurction with the overall pressure of Operation JUTCIDE CITY, caused the except to counts his forces in a sujer battle resulting in the defeat and, to a large extent, the destruction of the counts power of one of the energie min force requests. This was the first sajer battle in which the brigade as a whole participated. It remand the confidence of the brigade in its ability to engage and defeat the bast efforts of the orang and proved the walldity of the fundamental principles of security, firepower, and etherence to basic concepts of ground surface.

#### be lessens learneds

- (1) (a) Items Beginner work party security.
- (b) Discursions Sugineer work parties have been subjected to embasine and emissing because accuratly forces were too for each
- (e) Charactions Sturrity forces must be with the lead elements (usually mine clearing teams) and on either flank to be effective, accommissence by fire (artillery and small arms) works very well during need elements operations.
  - (2) (a) Items Mined Landing Lease.
- (b) Discussions Many II's and potential L's were booky tropped with common-determined charges. Charges veried from busine (up to 750 lbs), to clayers minus, to 155, 105, 62 and film shallownelly a small parameter force guards the II and is properted to determine the minus as indicapter lands.
- (c) Observation: A heavy artillery preparation from equantly ocurse the party to leave or will destroy the wires of command do to make devices. When discovered command do termined gives provid to the following memors:

1 th.

le Cet all wires leading from charp, one at

wil ties.

2. The wires tegethers lies Whaters-under pig

(Genelly ribbon charge) on top so that main ferce of charge will be down into the ground.

DEPARTMENT OF THE AUGTY HEADQUARTERS 30 BRIGADE ATH INPARTRY DIVISION APO US POSCES 98268

AVDDC-C

31 MACE 1967

SUBJECT: Lessens Learned "Battle of Suci Tre."

10: CC, 25th Infantry Division ATTN: S-3 AVODC-C

- 1. 34 Da, 224 Infantry.
  - a. Itam: "Stand to" Formation. "

Discussion: In accordance with SOP the bettelion conducted a 100% start thirty minutes prior to DOT and began a perimeter supep to clear the area of possible infiltrators. This action probably triggered the enemy attack. At the time, the Battalian was at 100% alort and this was critical in blunting the first assemble.

Observation: Conducting stand to and portanter sweeps continues to be one of the most important security measures.

b. Item: Conduct of security patrols.

Discussion: Around the base camp at 738 COLD there were two reinforced equad sise ambush petrols and OP/LP positions in front of each platoon. One patrol did hear and report noise at 6435 hours which slorted the battalion. More patrols observing the enemy would possibly have fixed the avenue of approach and enabled us to spell his attack with artillery.

Observation: Saturation patrolling is necessary for early verning. A squad size patrol from each company, OP/LP's in front of each plateon, and plateon size ambush on the primary evenue of approach is recommended.

c. Item: Reaction force.

Discussion: The Bn reaction force consisted of the Reconnaise-ance plateon and elements from the 2d Bn, 77th Artillary. The enemy attach, once initiated, was vigorous and determined. There was little time for any reaction before the base camp was heavily engaged. The reaction force had been rehearsed the night prior to the attack. They were committed and were able to blunt one posetration and recotablish the perimeter.

Observation: A ready reaction force proved to be a vital asset. To be affective they must be rehearsed and evallable with equipment immediately at hand. Areas of responsibility and signals must be rehearsed.

4. Item: Planned artillery concentrations.

Discussion: Very quickly after the essent was initiated artillary cussentrations were seeded within 30 meters of the perimeter. There was some delay in getting this fire as there were no proplemed fireg this close. SOMERADED AT 3 YEAR DETARVILS DECLESSIFIED AFTER 12 TRUS OCT SIR 5200; 1.

Ctearvation: Preplanned fires should be planned within 30 meters of the defensive perimeter. Preplanned fires should be adjusted as close as troop safety permits during initial organization of the defense and even closer concentrations should be plotted and on call.

2. 2d Bn. 12th Infantry.

4. Item: Fire coordination between units closing during reliaf of area under attack.

Discussion: During novement to FSB COLD on 21 Merch 67 it was necessary for the lead element of 2/12 Inf to shift from its original course during final phases of units closing. There was some difficulty encountared in coordinating fires as the reinfercing elements closed on FSB COLD.

Observation: Aeriel observers can eliminate problems of fire coordination. It is advisable to have one per battelion.

b. Item: Use of astablished trails during movement to provide relief to units under ettack.

Discussion: Upon receipt of warning order to provide a force to rainforce units under attack at FSB GOLD on 21 Mer 67, 2/12 Inf formed to move out. The bettelion perimeter then came under ettack by indirect fire from VC mortars(at that time it was of undercrained origin). Co C moved out immediately by the most direct route evolding established trails. They were followed by the remainder of the hattslion. Co C encountered sniper and mortar fire enroute to FSB GOLD but did not meet a large enemy force. By avaiding astablished trails units of 2/12 Inf were not effectively blocked in moving toward FSB GOLD. There is every indication from the morter ettach just when the bettalion started to move that the enemy had located the 2/12 Inf end had enticipated their ettempt to reinforce. If an enemy blocking force was used, they were not in the heavy jungle but were on the main avenues of approach. They were not able to significantly delay or block the advance of the 2/12 Inf.

- 3. 2d Bn, 77th Artillery.
  - e. Item: Artillery laner Perimeter.

Discussion: Even with Intentry support eround the entillery element, an inner perimeter is developed within the infantry perimeter. This inner perimeter consists of fighting heles close to the howitzers and the FDC bunkers. This perimeter is not manned, but is evellable in case of ground ettack for the entillerymen to fight from and protect their howitzers and FDC.

Observation: When the infentry was hit by the mass assaults, the inner perimeter gove the infentry a secondary position to fall both to. At the inner perimeter the ertilioryment were also evellable to beef up the fighting line. Use of the howitzers in direct fire could also be offected when the inner perimeter was manned.

b. Item: Use of Bookive in Direct Pire.

200

Discussion: After coordination between the infantry security and the entiliery, the time came when the need for beshive was essential to held the enemy. The infantry had fallon back to the bowitzer positions or taken cover into their own fembules to evoid the blast and the flechettee. Because of the close range of the enemy waves the fuses were set at massic action.

si

Observation: The bestive round was extremely effective in stopping the asseulting enemy troops. Later there were memoral bodies found that had been killed by the flachettee of the bestive round. It stopped everything in its path. An after action was the preparation of preplanned bestive concentrations for all howitsers. If the infantry and the individual howitser sections had the data for those concentrations, they would have called for them by target number depending on what portion of the perimeter needed them. Reaction time would have been reduced.

#### c. Item: Artillery Reaction Force.

Discussion: The artilisry battelion had two (2) reaction forces of 10-15 men each for use in strengthening the perimeter, both were needed. During the attack both reaction forces were committed to strengthen the infantry perimeter. Everyone on the reaction force must know the signal to assemble, where to assemble, and exactly how to manuver out to the weakened portion of the perimeter.

Observation: Rehearsels are essential in the assembly and deployment of the reaction force and the reaction force was rehearsed the evening before the ettack of LZ GOLD. This rehearsel proved invaluable as both the assembly and deployment went very swiftly and smoothly. Also each group should be armed with several N-73 Grenade Launcher and numerous hand grenades as both proved invaluable in holding off the assembly.

#### d. Item: Placement of Artillery for Metual Support.

Discussion: Each artillery position should have artillery within renge to support that position. The mutually supporting units can fire in the defensive concentrations for each other, fire the counter-morter targets for each other, and fire in general support in case of ground ettack.

Observation: The 102mm Nowiteer battery within supporting range of the PSB provided the primary artillery support, firing nearly 1100 rounds in less than four hours with must of it in the first 70 minutes. It was instrumental in the defense of the artillary position, and may have been the axtra punch needed to prevent an enemy penetration.

#### e. Item: Shields of the 103mm Hewitzers.

Discussion: Because of the air-mobile concept in the nevement of 105mm howitsors, shields have been removed to reduce the weight. During the attack on the Artillery position the howitsors proved to be a prime target of the enemy. Both receilless rifle rounds and small arms fire were used very extensively against the howitsors. Had the shields been on the howitsor, the crownen would have been efforded were protection and there would have been fewer friendly causalties.

Observacion: The extra weight involved with keeping the howitzer shields etterhed can be compensated for by leaving back several non-assential items of equipment. This policy has been initiated and one lift with shields has been made with no problems.

f. Itum: Use of hand grenades and grenade launchers (N-79) in fighting off an ettacking force.

Discussion: The most affective small arms weapon in stopping the attacking force was the N-79 grounds lesscher. Hard grounds were also very affective. The terraine was automatively furround honce the energy had natural cover in his approach to our position. The grounds lesscher and hand grounds were used very affectively against the attacking energy.

Observation: The small arms basic lead of emmunities for the haviteer bettery should be adjusted to double the number of N-79 grands leanthers and hand grandes. Extra grandes and small arms arms about he stored where it is easily accessible and close to the fighting below.

#### h. Item: Storage of assumition adjacent to howitsers.

Discussion: All amunition in an artillary position should be broken down and stored of the horitage positions. Under heavy attack, it is very difficult to get to an amunition storage erea. The amunition should also be placed in a bunker for protection. Much of our amunition was ruined by fire and several rounds detenated at the gun positions.

Observation: As quickly as an assumition recupply cames in it should be stored at the howitzer positions. Bushers with express and-bag cover should be constructed at each position to protect the assumition.

#### 4. 2d Dn 22d Infantry w 2d Dn 34th Armor:

#### a. Item: Speed and shock action in the attack.

Discussion: Once the enterview had committed himself to the battle the reinforcing ermor and mechanised forces were employed with as much speed as possible. They entered PSB GOLP taking full advantage of their seed and shock action.

Observation: The tactic of firepower and shock action was again proved affective as all the mechanised element: were arought inte use and none were neutralised despite the number of anti-tank weapons evailable to the enemy. (Over 30 RPG-II weepons and nearly il rounds of amount the).

#### 5. General.

#### a. Item Rainforcement time.

Discussion: Once ordered to move to reinforce PSB GOLD the commandars of the reinforcing battelione (2/12 inf, 2/22 inf (W), and 2/34 Armor' pressed to the attack without allowing their elements to gasidetisched, slowed down or engaged with enemy delaying actions.

Observation: The aggressiveness of the Battalian Commanders in moving to the scene of the battle enabled the Brigade to turn a well fought defensive action into a timely offense and substantial victory.

#### 6. Summery:

With the acception of some techniques in the use of the Sec-Hive round there were no new or startling lessons learned as a result of the Battle of Suoi Tro. Rether, the value of the assentials of proplanning, reheaving, preparing positions, and proper training to insure that every man can properly occumplish his easigned estation constitute the leason of the Battle of Suoi Tro. The principles of security, Surprise, Heas, and the importance of commenders at all lavels remaining mission ariented are as applicable in guartila warfare as in conventional warfare.
